Microsoft Windows AutoCAD supports native Windows API automation, and is available as a native Windows application. All native Windows applications must use one of the Visual Studio.NET tools for native programming. AutoCAD 2012 and later can create native installer packages for both 32-bit and 64-bit Windows versions. AutoCAD native Windows packages include a 32-bit and a 64-bit version. The installer also contains setup files for Autodesk Exchange Apps. The native programming tools are Visual Studio 2010 and newer. Some of the applications may also work with older versions of the Visual Studio, including Visual Studio 2008, Visual Studio 2005, Visual Studio.NET 2003 and Visual Studio.NET 2002. As of AutoCAD 2012 and 2015 the native Windows API functionality is no longer supported on non-32-bit Windows operating systems. File and folder manipulation
