GUI Designer Free Download [Mac/Win]

GUI Designer is a Windows application that can help you create, design and manage Graphical User Interfaces (GUIs) for Extron touch panel devices in an efficient manner, by providing you with numerous tools. You can specify a destination path on your system and follow the on-screen instructions provided by the installer to deploy it successfully. It features a standard Preferences window that you can access from the File menu. You can set the application's default startup action, adjust various project options, specify project directories and customize design view settings. When you launch the application, you are prompted to decide whether you want to create a new project or open an existing one. Generating a new project lets you choose from multiple panel types. More so, you can select a template or create your interface from scratch. It is possible to include various controls within your project, such as buttons, level gauges, popup page references, date or time widgets, images, shapes, lines and labels. GUI Designer supports both standard Extron TouchPanel Pro interfaces and Extron TouchLink Pro interfaces. You can use both to create your own specialized GUI interfaces with the help of different application tools. **Please do not hesitate to use our forums for any questions that you might have or you can contact us by e-mail: ***** To prevent automated Bots from commentspamming, please enter the string you see in the image below in the appropriate input box.
