A category has many tags. This is a many-to-many relationship. I want to get the categories which are tagged with a given tag. class Category(models.Model): title = models.CharField(max_length=200) class Tag(models.Model): name = models.CharField(max_length=100) category = models.ManyToManyField(Category,related_name='tags') This is my query: categories_with_tag = Category.objects.filter(tag__name='tag1') But this gives a list of dictionaries with no data, with the code below I am trying to get the list of categories. def categories_with_tag(tag_name): # get a list of categories with tag categories_with_tag = [] categories = Category.objects.all() for category in categories: if category.tags.filter(name=tag_name).exists(): category_with_tag = category ca3bfb1094
