In this study, we used the water samples of natural surface and ground water from the Central Anatolia region of Turkey for the determination of the bisphenol A (BPA) and 4-aminobiphenyl (4-ABP). The BPA and 4-ABP are representative organic pollutants that have been shown to be present in the surface waters of this region. The quantification of BPA and 4-ABP was performed using the filter-paper and immunoassay procedures. The results of the two-dimensional gas chromatography/mass spectrometry (GC × GC-MS) method showed that the BPA values in the water samples ranged from 0.24 to 4.14 ng L(-1), while the 4-ABP values ranged from 0.08 to 2.36 ng L(-1). The mean concentrations of the BPA and 4-ABP were found to be 0.67 ± 0.63 and 0.48 ± 0.46 ng L(-1), respectively. The BPA concentrations in surface waters of a freshwater source were higher than in the brackish water of
