“The Autonauts are in search of a new home after their spaceship was destroyed in a collision. They must work together to master gravity through six environments across an ocean planet. Finding new ways to interact with gravity will unlock new abilities as the Autonauts learn how to guide their ship and manipulate the elements. A perfect fit for family-friendly adventures and an original way to play ‘point-and-shoot’ games, you can play anywhere as an Autonaut.”The myth of Marshawn Lynch is that he’s resilient. How resilient, you ask? He got bitten by a beehive—dusted himself off—and was ready to play two weeks later. The truth? He barely played. The opposite of resilient, in sports, is tanking. No matter how bad things got—think Week 1 of the 2010 NFL season—the Seahawks never quit. When Lynch played in Week 3, he had a drop rate of 0.0% and a reception rate of 8.8%. Seattle’s offense was just that bad. When Lynch played in Week 4, he had a drop rate of 0.0% and a reception rate of 18.0%. When the Seahawks put Lynch back in the game, they scored 23 points and moved to third in the NFC West. Lynch played in Week 6, after a bye week, and it was business as usual. When Lynch played in Week 7, he had a drop rate of 1.0% and a reception rate of 18.0%. The Seahawks were 6-2, with a playoff date with the 49ers looming. Lynch played in Week 8 against the Jaguars. He had a drop rate of 5.7% and a reception rate of 25.2%. That same week, the Seahawks lost 27-7 to the Packers. Lynch played in Week 9 against the 49ers. He had a drop rate of 1.7% and a reception rate of 25.4%. The Seahawks won at Candlestick. Lynch played in Week 10 against the Cardinals. He had a drop rate of 8.4% and a reception rate of 25.2%. The Seahawks won at home to finish 9-6. The myth of Marshawn Lynch is that he can play through injuries. Well, here’s a newsflash, Seahawks fans: He can. Lynch still barely played
