You can find out more about Photoshop on its own Web site at www.adobe.com/products/photoshop and in the various online publications that recommend Photoshop, such as the following: • www.pbase.com/member_archives/photoshop_tutorials • www.scratchplanet.com • www.desktop-trainer.org/Photoshop/tutorials • www.getacademephotoshop.com After you feel comfortable with Photoshop, you can also read the Photoshop reference manual for more in-depth information and tutorials on how to manipulate images. Flash has a very dynamic interface that lends itself well to web design and animation and is therefore also another important tool. This book contains a bit of Flash content, both as examples to show you how things work and to give you practical steps to help you design your web page. However, it is not an Adobe Flash book. If you want to learn Flash, you need to read a book that contains that material. Our goal in this book is to provide you with all the necessary elements you need to know to design and build professional websites. We want to give you the training in Photoshop and Flash that you need to use these programs effectively on your own. ## About the Digital Cameras If you're trying to create your own photographs to use for your website, you need a digital camera. Digital cameras provide a snapshot mode that writes a file to the memory card and has a variety of ways to display those files. We use a Nikon D40x, which is a DSLR (Digital Single Lens Reflex) camera. It offers a good balance of image quality, image settings, and exposure setting. The Nikon D40x is the most basic of Nikon's DSLR's. It has a 3.2 megapixel (3,200,000 pixels) CCD (Charge-Coupled Device) color sensor, 1.2x zoom lens, a flash, built-in auto white balance, an Automatic Image Control (AIC) mode that enables you to take in bright sunlight with the minimum amount of image degradation, and a mode called Drive System. You can read more about the Nikon D40x and other DSLR's at www.dslrgear.com/master-dslrs. If you're just starting to experiment with digital

Our Father Our Father - This song refers to God as Father and is a way of thanking God for your relationship with Him. The words to Our Father are found in the American Standard Version (AV) Bible. It includes the words used by Jesus in the Lord's Prayer. You can read the words of the song here. We have also included, below the prayer, a short version of the Lord's Prayer found in many English Bibles. You can read the short version of the Lord's Prayer here. Our Father - A Brief Version Our father who art in heaven - God is to be prayed to with the title of Father, not Lord or Master. hallowed be thy name - we pray only to God, not to saints, angels or other persons. thy kingdom come - God's kingdom is to come. There is no need to ask God to bring His kingdom on earth. We can bring God's kingdom into our world by bringing God's love and forgiveness into our own life. thy will be done - this is God's will for us. on earth as it is in heaven - bring God's kingdom into our lives and help us to love God and each other. Give us this day our daily bread - this means more than giving people food. It is God's will for us to be sustained and nourished by God and our neighbours. This goes right to the heart of God's will for us. God is to be our provider and provider. and forgive us our debts - there is no use in asking God for forgiveness for things that are already forgiven. But this is a request for God to take the sins He has already forgiven us and use them to forgive us our sins. Police: Man accused of threatening to shoot officer October 11, 2012 12:00:25 PM PDT RIVERSIDE, Calif. -- Authorities say a man accused of pointing a rifle at a Riverside police officer has made several threatening phone calls to the police department over the past six months. Police say 30-year-old Larry Keith Davis is a registered sex offender who suffers from bipolar disorder and has an extensive criminal history. They allege that he threatened to shoot an officer and made bomb threats to the department, along with other public areas. In June, Davis was sentenced to three years in prison for allegedly threatening two homes in an attempt to collect money from a credit card dispute.

Q: Finding matching values in a list using value_count_by (or by similar methods) I have a list of values with the following properties [5, 'a', 'a', 'b', 2.12] I am trying to find the exact number of times each of those items occurs, for example: [5, 'a', 'a', 'b', 2.12] 5 a a b 2.12 I was thinking that using value_count_by might be helpful, but I'm not sure how to write it. For example [5, 'a', 'a', 'b', 2.12] list_values.value_count_by(lambda (v,*args): v) would not work. Thank you in advance for any help you can provide! A: from collections import Counter def get_count(lst): return Counter(lst) [5, 'a', 'a', 'b', 2.12] # Counter({'a': 2, 'b': 2, '5': 1}) get_count([1, 'a', 'b']) # Counter({'a': 2, 'b': 2}) [5, 'a', 'a', 'b', 2.12] # Counter({'a': 3, 'b': 2, '2.12': 1}) Q: Extracting the POSTed file from a Rest call I am writing a small rest client for a Cloud service that utilizes CORS (Cross origin resource sharing) in the post data, but I am having trouble finding documentation on how to extract the uploaded data on the server side. For example, I'm POSTing a file like this: POST /rest/v1/image HTTP/1.1 Host: [REDACTED] Content-Type: multipart/form-data; boundary=VVVVVVVVVVVVVVVV ---... Content-Type: application/json; charset=utf-8 Content-Disposition: form-data; name="image" Content-Length: 141246 {"width": 1000, "height": 800, "mimetype":
