AutoCAD Architecture Components The AutoCAD architecture includes the following four key components:

- * AutoCAD - The AutoCAD application itself is in this case the computer running the software, or AutoCAD.
- * Dassault VisualIS - The Dassault VisualIS component is a visual basic technology plugin for the Windows operating system that provides the user interface for AutoCAD.
- * AutoCAD Extensions - Most

AutoCAD applications also include plugins that let you do things beyond what's built into the core application. * Shared Components - Some of the features that are part of AutoCAD are implemented with other third-party software components. These shared components are used by any AutoCAD applications on the same computer or network.
