A Quiet Mind is a relaxing puzzle/adventure game where you can simply play, relax and think. It is about identifying with the objects that you see around you and learning to use them to fight to get home. Solving the puzzles will not only help you calm down, but it will also help you get out of the place. The world will be in your mind until you get home. The game will even help you with meditating. A Quiet Mind is about discovering a new 3D space with a low-pressure gameplay in a familiar and soothing environment to help you relax while you are playing it. You will often notice that a certain object in the game gives you a clue to the puzzle that you are currently looking at. The interactions with different objects in the environment are part of the game. You can use them to help calm down and get out of the place. Vanaris Tactics - Prologue Free

A gravity block game, designed for only one goal and that goal is to break your opponent's block by gently shifting it to new position, making the bottom of the screen a weird place. You will find yourself in a strange place, always in a different level, with its own gravity that allows you to move the blocks into a new position and make the opponent's block land to its right place. It's all about calculating, positioning and timing of a player's moves. A great game to play with kids. Instructions: All controls are done with the mouse. Just move it to a place on the screen, where you need to put down your block. The program takes the information from a mouse position and it calculates the gravitational pressure that has to be applied on a block to get it to move. The pressure changes from level to level and the players' health is reflected in their speed of movement. A level has only four stages and after a while you will get used to gravity. Try to beat your best score! You can use bombs, which will destroy blocks. NOTE: Levels don't take into account any time restrictions. The first levels are rather easy, but gradually get harder. Every game is random, so there is a possibility that you will get a game when it's hard for you. Help you build many different types of movable blocks and place them with the mouse. Move them to any position on the screen and remove blocks. Pick up blocks with the mouse. Remove many movable blocks with the mouse. Remove blocks as soon as they start moving. Get new blocks for your game from a wooden bin. Delete blocks that are placed at the edges. Find matching blocks and remove them. If the number of matched blocks reaches a certain limit, you'll be able to remove a block. You can remove any number of blocks. Unlock new types of blocks in the game when you're getting closer to a higher-ranked player. Unlock in-game extras. Have you ever had the experience of playing a game that you just love, but over time you get tired of it? Gravity Block has been on my mind lately, and now I want to take it off my computer. There's been several cracks for Gravity Block, but I want to be able to feel the weight of this game for the rest of my life. This review contains spoilers, click expand to view. Also, a few months ago, I had played Gravity
