6.0 is a 3D CAM program for 3D modelers and 3D  
machinists that has advanced functionality, yet easy  
of use. MeshCAM 6.0 helps you to create your own  
CNC programs including drive programs and move  
programs. The machinist will also create advanced  
path generator and spindle control programs.  
MeshCAM 6.0 comes with a complete set of 3D  
printing tools. With MeshCAM you can create a  
realistic 3D preview of your part before printing. The  
3D preview will allow you to make adjustments to  
the printed part based on the real-time 3D model of  
the part or to create your own custom Z axis files to  
be added into your print. VIRTUAL DOCKING 3D  
STATION MeshCAM 6.0 now have the ability to save  
your configuration in the style of CNC in the save  
tool. This feature allows you to save the  
configuration of your machine while the machine is  
ON. MeshCAM 6.0 does not need any cab (a full  
computer) to be running. You can store the  
configuration as an XML file or a.xlsx file, and you  
can save it as a file that is compatible with any CNC
