
Freightliner Abs Retarder Relay Location

Download

July 31, 2021 - Does anyone know the location of the relay? Sometimes after replacing the ABS ECU, this code appears until you disconnect the retarder relay and activate j1939 with wabco ... code 317. And I can't figure out why when I do a diagnostic and the retarder relay is still on, the code disappears... so what happens to the retarder relay is that when the diagnostic codes disappear, the retarder relay turns off. Can anyone help me or provide some research and maybe an error code? Thank you in advance The retarder relay connects to a wheel speed sensor that detects wheel speed using an electromagnetic relay.
