If you are about to make a wedding slideshow or need to show a funny wedding picture to your friends, you might want to try out a few slideshow makers. After all, creating a wedding slideshow can be very enjoyable, especially if you have a creative mind. But because a good slideshow requires dozens of photos to be used, an easier method is to make it yourself. All you need is a few seconds, a credit card, and of course a lot of photos. Here are 10 great programs that can help you make your own cool and funny wedding slideshow in a jiffy. Here are a few free options that you can test out first, or pay if you think your special day will be shown around the whole globe. Loopzilla is yet another slideshow maker that is easy to use, and has a huge collection of free backgrounds, icons, and clipart that you can use. Although this is a free application, the full version will cost you around \$14.95. However, for a simple wedding slideshow, this is the best slideshow maker out there. To create a slideshow with this program, just add text and background images, and it will automatically create a slideshow with a narration and music. You can even record your video and set it to loop. But be warned that there's a limitation in Loopzilla. For example, you can't add more than 10 photos in a slideshow. And even if you use this slideshow maker to create a video, the clipart is limited to 4 frames and there is no inclusion of any fonts. Wedding video packages like those offered by Muvee come with templates designed by qualified professionals. If you want to make a slideshow of your wedding day pictures, you have lots of choices to go for.
