Airbox PRO Broadcast Playout Software

PlayBox Neo's IBC Broadcast Playout software is a scalable solution, from small regional channels up to large national broadcasting networks delivering multiple languages to their global audiences across many timezones. Its features include dynamic text titles, automatic live text to speech transcription, automatic captioning, stock asset library for graphics and logos, voice transcription, multi-platform streaming, automated upload to digital media server, news presenter interaction and the ability to rotate through multiple languages, one after the other, with no lost synchronization. PlayBox Neo's OTT Broadcast Playout software allows you to create dynamic and personalised non-linear video streams that look and sound great

on any device, by utilizing the same exact assets as you do for linear broadcast channels, including automated captioning, IPTV multiscreen, on demand and third party applications, such as video sharing, social networks and eCommerce, all being managed through a single platform. The same delivers that one broadcast look, feel and sound to your subscribers, with minimal maintenance and cost. Resolume Arena specializes in high-quality and non-linear content including live and pre-recorded events, shows, commercials, news, sports, games, music, podcasts and video, with music, eCommerce and application on demand. With Resolume Arena, you can easily control editorial, narration, songs, videos, ads and more all through the same user interface. Multiple playout outputs including CDN and local file delivery make this the premiere broadcast software application you need. 5ec8ef588b
