IBM Support Assistant Workbench For Windows Latest

IBM Support Assistant Workbench is a full-featured, self-service solution that delivers rapid diagnosis and resolution of issues without the need for staff intervention. With the Workbench, you can help your customers quickly get back to doing what they do best: building business. The Workbench helps you connect with customers and share information, then it uses your expert knowledge to perform the diagnosis to eliminate possible causes and the resolution to recommend the best-fit solution. SSA helps you get real-time reports, insights and answers for support on how your solution is being used and how you can further improve it to improve the customer experience. To help you manage and respond to helpdesk tickets, SSA also provides an integrated, user-friendly user experience and helps create and deliver automated and personalized responses, including direct messaging, email, web links, chat, and more. With Workbench, you can help your customers quickly get back to doing what they do best: building business. SSA Helpdesk With SSA, you can easily configure your cases, set how they are communicated to your customers, and track them, as well as provide helpdesk support to them. With Workbench, you can easily configure your cases, set how they are communicated to your customers, and track them, as well as provide helpdesk support to them. The IBM Guided Activity Assistant (IGAA) helps you at every step of a problem determination scenario. If you are a new user and want to understand what step to take next, IGAA can explain to you in detail what step is appropriate to take along with the supporting information to give you a deep understanding of the problem and the recommended solutions. If you are an advanced user and want a quick reminder of the steps to take, IGAA helps by only showing the information that is necessary for you to quickly move through the steps. At every point along the path, additional information is only a click away if you want to brush up on a specific section. IGAA also helps you organize your diagnostic files as they are requested by IGAA. You can upload the files or link to them if they are too large to make copies of them. Those files can then be passed seamlessly to the appropriate tools that are recommended in the walkthroughs. If IGAA does not have the walkthrough that helps you solve your problem, it can help you engage the appropriate IBM support representatives. IGAA will quickly bundle up the information you have already gathered and send
