## **What's New in the PROBILZ?**

PROBILZ is an enterprise application for companies that want to track inventory. It is a scalable inventory manager that will grow with your business by using a flexible database engine. Features: - Over 140 functions to manage the processes on your business - Tableau based system that can be configured and expanded easily - Several types of log files to help you manage your inventory and transactions - Real time statistics to help you react quicker to changing conditions - Multiple storage systems - Multiple regions and locations - Advanced search functions to find the best suppliers for your products - You can select if you want to see the prices or the sales on the screen - Various business areas (Sales, Purchasing, Project, Stock) - Personal and configurable time templates (calendar, weekly, monthly) - Export to MS Access, MS Excel and CSV Attention: The trial version only works with one user, one database and only for one minute. It can be used for free but only with limitations. If you need more features you need to select a version that is suitable for your activity here. The application can export all data to MS Excel format. Once you start using it, you will notice that it becomes very useful in your daily work. The setup process takes less than a minute. NOTE: The trial version of the program can be used for only one location or for one region. If you want to start using PROBILZ, you need to buy the program. Your data will be stored in the cloud and can be accessed from any computer via the internet. You can always create an unlimited number of users and databases. You can also create your own log files for each user. The program will grow as your business grows and will be suitable for use in small, medium or large companies. The program is designed to be used by companies that want to track their inventory with real time data. With the help of this program, you can control each point of sale and invoice. You can also track and manage your suppliers, products and invoices in real time. ProBILZ supports multiple products, locations and suppliers. You can create multiple zones and configure your displays. You can also create your own log files for your invoices and suppliers. Your business can also be segmented by sales, purchasing, project or stock. All transactions can be recorded in real time. You can use multiple warehouses and provide access to them from different locations. The program can also save and upload reports and statistics in real time to your web browser. You can access the database from any computer and mobile devices. The database can be used by multiple users with different access levels. The program has a customer management module that will be very useful for your customers. You can connect PROBILZ to MS Access
