Das Unit Converter With Full Keygen

Das Unit Converter is a unit converter that helps you to convert values from one unit to another. Its main features include the support of most countries in the world, all the main units (such as: acceleration, angle, distance, flow, force, pressure, sound, temperature, time, torque, weight, etc.) and the ability to copy the result of the conversion to the clipboard. The app includes more than 2,000 units and over 80 categories, and you can even add new ones, as many as you want. The conversion will always be carried out in the most accurate way, using the best exchange rates from the internet. In the main menu you can choose to show the list of units or the list of categories, search for unit results or view the conversion table. You can also set the units you wish to use for conversions and flip the result to the other side. Another key feature of this app is that it can work with any currencies in the world, as well as the usual units: US dollars, Euros, British pounds and so on. You can even convert to the world currencies, such as: Rubles, Lei, New Lira, Pesos, Won and Yen, and so on. It is also possible to show the conversion table by country, showing the most used currencies in that country. The app also includes a calculator and a notepad. The app was developed with the intention of being an easy to use app for everyone, as well as being a high quality tool for professionals who need to convert values all the time. Das Unit Converter Features: * Main Units * Convert and flip values * Convert to most common currencies in the world * Flip results to the other side * All the main units in the world * More than 2,000 units and 80 categories * Use in more than 20 countries * Convert to more than 40 currencies * Search results in all categories * Filter results by countries * Calculate results in any currency * Change the current unit at any time * Show the result in any currency * Display the results in a table * Use both the numeric keyboard or the graphical user interface * Copy the result to the clipboard * Flip values to the other side * Use the calculator * Use a notepad to write the result * Many more options Similar news: Skype and Facebook deal'reported' - VentureBeat Microsoft's Skype and Facebook
