What's New in the QFMouseKeys?

QFMouseKeys is a lightweight application designed to help you control the mouse using the keyboard. QFMouseKeys can store up to 7 key combinations, enabling

you to easily select the one you want to use. You can use different keys to perform mouse clicks, move the cursor and set the cursor speed. This is one of the most popular keyboard shortcuts programs! QFMouseKeys is lightweight and easy-to-use, with a rich and configurable keyboard shortcuts editor. Features:

- * Mouse Speed Control: to control the speed of the cursor, you can also set the number of clicks.
- * Key Combination Editing:

you can define a combination of any number of keys to control the mouse (For example, Ctrl+Alt+0 to set the cursor to the beginning of the page, or Ctrl+Alt+8 to set it to the end). For each combination, you can define the delay in ms between every key press.* Option to Toggle auto-repeat: if you're using Ctrl+Alt+n, QFMouseKeys can automatically repeat the combination when the mouse goes beyond the edge of the screen.*

Mouse Settings: for each mouse action, you can choose from different settings such as:

- * Clear Screen: clear the screen of the application.
- * Hide Cursor: hide the mouse cursor.
- * Cursor Speed: you can set the cursor speed.
- * Mouse Action: there are two mouse actions available:
 - * Click
 - * Move To Next Screen: to move to the next screen
 - * Move To Previous Screen: to move to the previous screen
 - * Scroll Down: scroll down by one screen
 - * Scroll

Up: scroll up by one screen* Start
Zoom: start the zoom out function
QFMouseKeys allows you to control
the mouse using the keyboard.
QFMouseKeys is lightweight and
easy-to-use, with a rich and
configurable keyboard shortcuts
editor. You can define a combination
of any number of keys to control the
mouse (For example, Ctrl+Alt+0 to
set the cursor to the beginning of
the page, or Ctrl+Alt+8 to set it to
the end). In addition to the mouse

controls, you can define the actions that will be performed when you press the keys. You can choose to toggle auto-repeat (Ctrl+Alt+n), use the mouse to set the speed of the cursor (with Clear Screen, Hide Cursor and Cursor Speed options), or let QFMouseKeys automatically change the mouse settings. Some of the options can be configured for each mouse action, such as the color of the cursor. You can choose to use the mouse to move the cursor to the

next page (Move To Next Screen mouse action) or to the previous page (Move To Previous Screen mouse action), or you can use the scroll down and scroll up mouse actions to scroll down or up. To display the list of shortcuts, you can press Ctrl+

System Requirements:

Internet: Broadband Internet service required for online features and access to the game. 3-D Vision: Must be compatible with the 3-D Vision peripheral and v3.0 graphics drivers for your system. Additional Notes: This game is intended for use with the v3.0 NVIDIA or ATI graphics driver. It is not compatible with the v2.0 or v1.2 NVIDIA or ATI drivers. The game is designed to be

played in a PC, and therefore will not function in a Mac or other platform without modification
