Vonext Menu X Download: The theme of Vonext Menu X is in need of improvements. This software is great for average user but can be improved in terms of visuals. Though there are some changes and improvements made, they are very limited. Vonext Menu X Review 4/5 Welcome to Vonext Menu X, the best application launcher for Windows. Vonext Menu X is a user-friendly utility that can replace the default Windows 7 start menu and give you total control of your programs, hardware, files, music, etc. The main purpose of application launchers is that they enable users to save time whenever they want to run programs on a regular basis. Needless to say, when this function is complemented by additional ones, such as creating desktop notes or playing music, all within the same interface, users can save even more time - and this is the ultimate goal of Vonext Menu X. User-friendly app launcher and file finder Once you have completed the smooth installation process, a floating button will be added on your desktop - you can move it to any position you see fit, so as not to disturb you in your work, and you can also replace its default icon with an image of your choice. Clicking this button reveals the main uses of the utility, namely file search, app launcher, music player and note creator. When it comes to quickly locating a file, you only need to specify the path, then enter the keyword - if you are not sure about the path, you can leave it empty and Vonext Menu X automatically searches all your drives for the specified filename. Additionally, you can create a list with the files, folders and programs that you frequently use, so as to launch them with a single mouse click. Pin desktop notes and play music Another handy feature of Vonext Menu X

In this article you will learn how to do a good wallpaper (background) from any image source. It is best when you have a very powerful computer with 4 or more cores and good graphic card to change this. Also a good use for a TV with good resolution is a good choice to play with. There is a professional way to get good results but it is also possible to do a very good result using only some computer functions. The idea is to do some lines to blend the image or the texture of the wallpaper with the existing wallpaper. Let's get started. 1) Open your image in Photoshop or other program you like. 2) Select a part of the image you like and copy it to the clipboard. 3) In Photoshop open a new image, paste the image you just copied to the clipboard and name it the same as the image you want to create. 4) Blend the two images by using the image adjustment tools available on the photo editing software. 5) Save the image. That's it. That's all. It is possible to do this using other programs than Photoshop, but using Photoshop will be more user friendly.
