"Give yourself a time-saving, effective, and even permanent solution to the problem of fading magazine pages. The fix is so simple that It's kind of embarrassing: Since pages simply fall apart when proofed, it makes sense to leave them alone, but a new Photoshop script helps you do just that, In just a couple of steps, you can render your unwanted white patches crisp and clear— Because it's a script, it works on your entire image at once, and you get the best results in no time with perfect, Unnoticeable, Transparent white areas." "Create a black-and-white version of a color image and you can combine it with any color file to make it look as if it had been taken in black-and-white. This script combines the color versions of your original image with a version of the same image rendered in grayscale. A new, better control lets you make the color black and the grayscale white. Choose your favorite grayscale color from a palette, or leave the color area empty to let the script choose a color that best fits the grayscale image." "Select and cut the sky and drop it into a new layer. Mask the other sky layers. And delete the hood ornament and greasy wheels. Or the trailer. Go through your image and select all those things you want to remove digitally. Then drop them into a new layer, *and* mask it. In the layers panel, switch to a layer containing the Watermark, click Mask, and paint with black. The trailer, hood ornament, etc. will disappear. The whole image will be white—but this image will look like the old photo."
